SMP Logic Systems Announces Registration of Intellivax Trademark

SANTA MONICA, CA, February 24, 2009 – SMP Logic Systems, a research based software development company focusing exclusively on pharmaceutical manufacturing industries, announces today that its Intellivax Trademark has registered on the United States Patent and Trademark Office Principle Register as registration No. 3,579,193. The trademark was registered in Class 009 for “computer software in vaccine manufacturing”.

Intellivax is a fully integrated intelligent execution system specifically for vaccine manufacture. Intellivax integrates all aspects of vaccine manufacturing to allow manufacturers to consistently produce high-quality vaccines. Intellivax offers several key features including proprietary analysis tools to continuously monitor all aspects of vaccine production and allow for a risk-based assessment in case of quality deviation.

About SMP Logic Systems

SMP Logic Systems is a research based software development company focusing exclusively on pharmaceutical manufacturing industries. Its products aim to revolutionize pharmaceutical manufacturing processes and systems allowing manufacturers to fully integrate process controls. SMP Logic Systems offers several platform technologies that enable pharmaceutical manufacturers to monitor and track the entire manufacturing process from inception to completion. The Company's offices are located in Santa Monica, CA. For further information about SMP Logic Systems, please visit www.smplogicsystems.com
